

User Story	Task	How to Test
As a parent I do not want my child to miss out on socializing with other children.	Networking	Load up on two different systems and see if they can properly interact with the space at the same time, ex: can two people play catch with a ball or a frisbee.
As a patient I want to be able to play with my friends.	Networking	Load up on two different systems and see if they can properly interact with the space at the same time, ex: can two people play catch with a ball or a frisbee.
As a patient I want my space to feel personal because hospitals look and feel sterile.	Decorating/personalization space.	Check to see if objects can be hung on the walls, does exiting properly save what has been done.
As a patient I do not want the reason for my hospital stay to inconvenience others so that it does not feel like a chore or obligation to have me participate.	Networking	Load up on two different systems and see if they can properly interact with the space at the same time, ex: can two people play catch with a ball or a frisbee.
As a parent I want time between medical treatment to be spent productively so that my child does not become depressed and lethargic.	Basketball Scoring System	Does the ball going through the hoop add to the score, will it only count if the ball enters from above the hoop.
As a doctor I want my patients to keep their mood up to help them stay healthy.	Positive Affirmation	Does the affirmation only show when scoring, does it go away automatically, does only one show up at a time, is there a variety of text that show randomly.
